

Newforma Project Center Project Migration Services for Mergers and Acquisitions

Newforma Services will provide planning, consulting and technical services for bringing Newforma Project Center environments together into a single environment. During several working sessions, a project plan is developed and executed in collaboration with customer IT resources.

- Develop a project plan for Newforma server and client infrastructures centered on business goals and Newforma Best Practices
- Deliver key Project Center configuration and migration services
- Deploy replacement Project Center and Info Exchange Servers into target environment
- Validate success of deployments and project migration
- Provide single point of contact throughout the migration process for all questions and answers

This service is recommended for customers looking to:

- Combine multiple existing Project Center Server and Client environments resulting from merger and acquisition activity
- Deliver clearly communicated transition plans to end users and administrators
- Minimize downtime for users, clients and partners who rely on Newforma solutions

A Newforma Technical Consultant will work with the customer's established IT resources and Newforma Champions group to deliver this service.

Pricing for this services package is based on service scope. All work is performed remotely. Optionally, a Newforma Technical Consultant can be onsite for an additional charge. Weekend and off-hours delivery is available for an additional fee.
